Crookston, MN 56716

---

**Q:** The manufacturer of the radios includes cellular data at no cost for their PTTtoC solution. Therefore, there is no monthly charge from the cellular carrier, just the charge for their server access for the devices and dispatch positions. Currently they are partnered with AT&T and T-Mobile. Provided the coverage is in congruence with the needs of Tri-Valley, is there an issue with not using Verizon?

**A:** Refer to the requirements in the RFP illustrating the cellular coverage.
